## Delta Industrial Goes Green

*Focused on delivering the best product at the best price, Delta Industrial makes a long-term investment to hold down costs and help preserve natural resources.*

**Chesterfield, MI.** – Delta Industrial has instituted a Green initiative to reduce energy use and costs in order to better serve their national consumer base. The company has switched from pickup trucks to a fleet of Ford Fusions for their sales staff.

In addition, a GPS tracking system has been installed on all company sales, supervisory and construction vehicles. The system enables Delta to ensure that the vehicles are traveling the shortest route to the job sites and being driven in the most efficient manner. Delta has reduced fuel consumption, and the savings have been poured back into the business in order to reduce project costs. The company is continually looking for ways to improve services and reduce costs by teaming innovative thinking and technology.

Delta Industrial, the recognized leader in machine foundations, press pits and industrial concrete construction has offices in Chesterfield Michigan, Trussville Alabama, and Fort Thomas Kentucky. The company founded in 1993, specializes in the design and construction of machine and press foundations, concrete flat work and steel fabrication.

About Delta – We are a “Full Performance,” company with the ability to control every aspect of construction and we own all the necessary construction equipment. We are well versed in cutting edge construction techniques and are able to assist our clients from concept through design to finished product. We have worked with a wide and diverse base of companies throughout the country.
