

Delta Industrial proves that

**DELTA DOES
WHATEVER IT TAKES
TO MAINTAIN AGGRESSIVE SCHEDULE**

April, 2018:

Compressed time schedules are no problem for the pros at Delta Industrial. So when Fukai Toyotetsu Indiana Corporation (FTIC) needed a 3000-ton press foundation, 1000-ton blanking line press foundation and 1600-ton press foundation built concurrently, Delta rose to the challenge. Bringing in the additional manpower, materials, and equipment necessary to tackle the project, Delta worked a 24/7 schedule to maintain the aggressive schedule. In the rigorous building of these foundations, they also provided scrap conveyor tunnels, bolster rail foundations, utility trenches, de-stacker feeder foundations, looping pit, un-coiler pit, 32,000 square feet of slab on grade and removable scrap conveyor tunnel tops. Project completed - on schedule and on time.

About Delta Industrial:

Delta Industrial is a “design-build” specialist, offering a variety of professional contracting services, including machine foundations, press pit foundations, slitting line foundations, general building maintenance & construction, concrete flatwork and steel fabrication & construction. With the diversity of construction knowledge that Delta brings to the job site, it quite simply GUARANTEES success in all facets of the project, regardless of the scope of work. From concept through design to finished product, Delta provides in-house services to accommodate all of your industrial contracting needs.
